

Wine Grapes **ALBARIÑO**

Quality white variety produced in Galicia (D.O. Rias Baixas and less in the D. O. Ribeiro).

PHENOLOGY

Very early sprout and maturation.

CLUSTERS AND BERRIES

Small-sized cluster, sometimes with a wing. Small, round berry with dark golden and slightly brownish colour when ripening.

PESTS AND DISEASES

Sensitive to oidium. Slightly sensitive to mildew. Very resistant to botrytis.

AGRONOMIC CHARACTERISTICS

Fertility begins from the third bud. Medium yield due to its clusters and fertility; therefore, it requires long pruning. Requires fertile and cool soils.

OENOLOGICAL CHARACTERISTICS

High alcohol content (12-13°) with a remarkable total acidity (7-9). Great organoleptic quality. It is one of the most valued varieties in the market.

SELECTED CLONES

CSIC-07, CSIC-08, CSIC-09.
