

Wine Grapes

PEDRO XIMÉNEZ

Main white variety in the D.O. Montilla-Moriles, in the province of Cordoba.

PHENOLOGY

Average sprout and maturation.

CLUSTERS AND BERRIES

Medium-sized, dense clusters with an uneven distribution of berries. The berries are elliptical, medium-sized and greenish yellow.

PESTS AND DISEASES

Very sensitive to botrytis and mildew. Sensitive to oidium. Sensitive to esca, eutypa and termites.

AGRONOMIC CHARACTERISTICS

Vigorous variety with high yield. Needs a lot of sun. Develops very easily in high altitudes.

OENOLOGICAL CHARACTERISTICS

Produces great quality, rich wines, both dry and sweet.
