

Wine Grapes

PRIETO PICUDO

Variety grown in León and used to make sparkling wines.

PHENOLOGY

Early sprout and maturation.

CLUSTERS AND BERRIES

Small-medium sized, with short wing. Small and oval berry.

PESTS AND DISEASES

Very hardy variety, slightly resistant to pests and diseases.

AGRONOMIC CHARACTERISTICS

Medium to low production. It is a creeping plant; therefore, it should be conducted on trellis systems. Late pruning recommended to avoid frost.

OENOLOGICAL CHARACTERISTICS

Naturally sparkling Rosé wines are made from this variety with a nice and peculiar taste. It can also be used to make wines produced by carbonic maceration.

SELECTED CLONES

CL-110.
