

Wine Grapes

TEMPRANILLO

It is the most cultivated red variety in Spain in recent years.

PHENOLOGY

Sprout occurs earlier than Cabernet Sauvignon and after Red Garnacha. Early ripening (same as Merlot) and 7 days before Cabernet Sauvignon.

CLUSTERS AND BERRIES

Medium-Large cluster. Medium-sized berry.

PESTS AND DISEASES

Sensitive to mildew, oidium and botrytis.

AGRONOMIC CHARACTERISTICS

Upright growing with big leaves. High yield. It is important to control its production in order to obtain high quality wines for ageing.

OENOLOGICAL CHARACTERISTICS

Produces wines with a high alcohol content, rich in tannins and a persistent colour; controlling its maturation is important.
